Mathematical analysis, Non-linear systems

4448651

An analysis is given of a problem of disturbance propaga-  
tion in a medium with nonlinear stress-strain relation.  
Euler's representation for a solid medium is utilized.  
Treatment of the problem is similar to that used by  
Tayler, but contrary to the latter's approach, here the  
principal attention is paid to the theory of propagation  
of shock waves.

Trans. of Akademiya Nauk SSSR. Doklady, 1959, v. 127, no. 1, p. 17-19.

DESCRIPTORS: \*Topology, \*Functions, \*Statistical processes, Probability, Mathematical analysis.

A number of general theorems is formulated on the topology and the excessive functions, connected with arbitrary discontinued Markov processes. (Author)
